

X-RAY KUB

Bilateral renal soft tissue shadows reveal no evidence of abnormal radio-opaque density.

No obvious focal opacity seen along the course of bilateral ureters.

No evidence of radio-opaque density in the region of urinary bladder.

No evidence of abnormal air-fluid levels.

Visualised lumbar spine appears normal.

Pelvic bones and bilateral femoral head appear normal.

IMPRESSION:- X-ray KUB(including USG screening) reveals no significant abnormality. Suggest clinical correlation.
